

QUESTIONAIRES TO BE SENT TO ELIGIBLES SOON

Within 30 days from next Saturday the government will be in possession of a mass of detailed information which will indicate more specifically the exact status of every man available for any kind of war duty, than the sum total of that which has been collected through the agency of the local and district draft boards throughout the country since the passage of the conscription act, according to a member of the Maricopa county local exemption board.

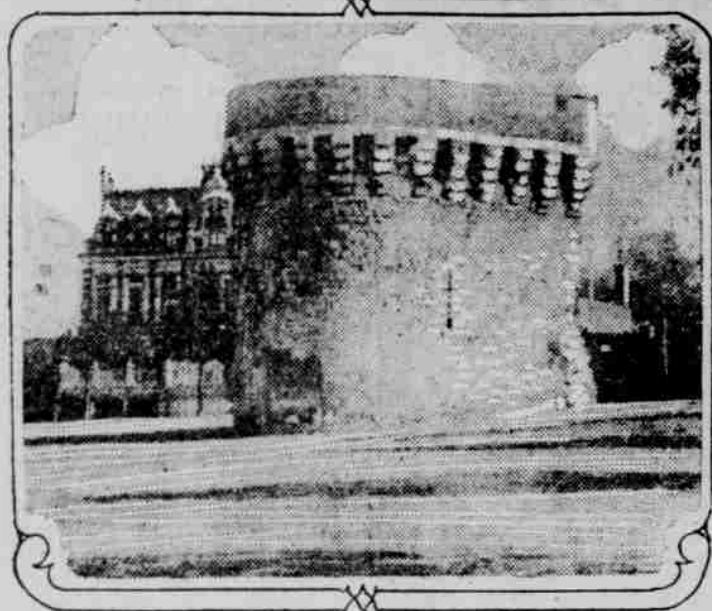

Saturday, December 15, is the date which has been officially set by the government for the mailing out of the questionnaires which for several weeks past have been on hand at the headquarters of the local board, and whose distribution have been pending the completion of lists of the names of men to whom they will be sent.

The questionnaire, in the opinion of military experts, will provide the government precisely the kind of information it needs in operating a truly selective draft. Armed with the most minute details relative to a man's private life, it will be possible to assign him to the peculiar duty to which he is best adapted.

"The government has taken advantage of a peculiar kind of psychology," said a member of the board yesterday, "it will put up to the individual the duty of answering all questions and answering them correctly. It presumes that the realization of the causes which have brought this country into war will influence him towards answering all queries truthfully. If he does not a penalty has been imposed which will serve to convince others that the government is in real earnest. Not only has Uncle Sam laid down the law with regard to the correct answering of all of these questions but he has stipulated that the questionnaire shall be returned within a certain definite time limit. A penalty is also provided for any breach of these orders."

After the questionnaires have been returned to the local board it is esti-

BRITISH FORCES IN SIGHT OF OLD FORT ON THE OUTSKIRTS OF CAMBRAI

This old fort on the outskirts of Cambrai, France, is now within sight of the British forces. In olden times the fort was useful; now it is merely ornamental. One well placed shot from a big gun would demolish it.

imated that at least one month will be required to carry out the orders from headquarters which specify that the returned papers shall first be arranged in numerical order and later in alphabetical order. After this has been done the federal authorities will devote themselves to the task of classifying eligibles into groups, best fitted, respectively, for service in the several different quarters where the government needs help. All previous classifications, numbers, etc., are made null and void by the new plan. The slacker will be included in the first of those who will be called to the training camps. Next will come the single men, who without dependants, and physically fit fill every requirement that should constitute a man's eligibility for military duty.

WHAT TO DO WHEN SPRINGS ARE WEAK

When in the course of operation valve springs become weak, they should be stretched or else have a

washer placed under them. If a car spring becomes weak so that one side of the vehicle sags, the addition of another leaf will remedy the trouble. In a new car it frequently happens that the owner finds cause for complaint in regard to hard riding, due to the fact that the springs are stiff. This difficulty may be obviated by removing a leaf, if so desired, but before long the new springs will lumber up merely through ordinary usage.

FOOTBALL STAR ENLISTS

[Republican A. P. Leased Wire]

SOUTH BEND, Ind., Dec. 12.—"Big Frank" Rydzewski, the giant Pole, who has been the mainstay of the Notre Dame football line for the last two years, has joined the forces of Uncle Sam, it was announced here today. He enlisted in the ordnance department. Thus far Rydzewski has won honor as center on all-American, all-Western and all-Indiana teams picked by leading sport writers of the west.

YUMA ROAD IS WELL LOGGED

The road to Yuma has been carefully logged and general directions and mileage, starting at the court house here, are as follows:

SPEEDOMETER FAILINGS

When the speedometer fails to regis-

ter, it generally means that the flexible shaft end is not making connections with the rotating shaft of the speedometer. At the ends of both of these are flexible joints and if the shaft pulls away from the instrument even slightly there will be no registration. This is because the shaft in turning does not turn the shaft in the speedometer. The remedy is to disconnect the shaft at the instrument

end, push it tightly in place and then lock it.

USE FOR OLD OIL

When the crankcase is drained, the oil after being thoroughly strained may be used in the gear-set during the cold weather. This oil is of just the right consistency to give good results in gear-set lubrication at this time.

Christmas Suggestions

We still have a very nice line of toys, handkerchiefs, sweaters, gloves, bath robes, brushes, mirrors, blankets, coats and dresses.
